Dear Joshua:

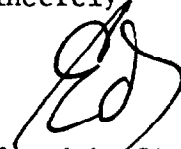

Many thanks for your very helpful letter! Not only was your confirmation of some of our opinions gratifying, but you presented several new ideas and new ways of looking at the problem that will be most helpful to us in arriving at a logical and objective opinion about the matter. My sincerest thanks to you!

Yes, I do have some late news on the Buchner translation project! And certainly because of your initial push in this matter you deserve to have the latest information which is: Inter-science Publishers, Inc. have come to final terms with Buchner's Swiss publisher and will publish the translation being prepared by Dr. Mueller in Hawaii. As you may know, we were able to get a Public Health Service grant to support the costs of the translating, but we could not get their financial help on the publishing which was to have been done on a nonprofit basis by the University of California Press. Walter Carter had Dr. Mueller start the translating anyway, in the meantime interesting Inter-science in the venture. So I guess it is now all squared away. The last time Prof. Buchner wrote me he said he was going to make some corrections and additions in the English edition, so I suppose it will be touched up a bit over the German.

Steinhaus, E.A.

Again, many thanks for your letter. Warmest regards,

Sincerely

Edward A. Steinhaus  
Professor of Insect Pathology
